gloves, glasses, and, if necessary (e.g. insufficient ventilation), also a respiratory protection device. Use the product only in well-ventilated areas. While in use and immediately after finishing working with the product, wash your hands thoroughly with water with soap. Do not eat, drink or smoke while using the product. Avoid contact with eyes and skin.

Do not inhale the spray. In case of eye contamination - immediately rinse eyes with water, continue rinsing with eyelids wide open. Do not rinse your eyes with a strong stream of water - there is a risk of mechanical damage to the cornea. Consult a physician. In the event of inhalation exposure, the injured should be moved to fresh air, ensuring peace. A doctor should be consulted, especially in the event of any disturbing symptoms. Rinse contaminated skin with plenty of water. If irritation develops, consult a doctor. If swallowed, give plenty of water to drink.

Do not induce vomiting. Never give anything to drink to an unconscious person. Consult a physician. Before use, read the label on the package or refer to the product safety data sheet.

### Attention:

The recommendations and guidelines contained in the document are based on our experience and practice. Due to the variety of materials and substrates as well as the variety of possible applications that are beyond our control, we cannot accept any responsibility for the results obtained. A trial is recommended in all cases. The product can be safely used for cleaning surfaces that come into contact with food, provided the manufacturer's instructions for rinsing and drying are followed.
