	CERAMOCLEAN stone, tiles	

APPLICATION.

CERAMOCLEAN is a product intended for cleaning floors made of all types of tiles, as well as natural stone slabs. It is especially recommended for cleaning tiles covering surfaces subject to heavy traffic in rooms such as shops, warehouses, production plants and warehouses, shopping centers, hospitals, schools and restaurants. It also perfectly cleans external surfaces such as stairs, sidewalks and squares paved with cobblestones or natural stone slabs.

HOW TO USE

Any unbound materials should be vacuumed or swept off the surface before use. Oil stains and deep dirt should be removed first. The air and surface temperature suitable for cleaning is between 5°C and 35°C. Cleaning when the temperature is below zero may be harmful to the surface. Do not use on surfaces that are frozen or have standing water. Use an automatic scrubber, brushes or cleaning mop to clean the surfaces. The agent should be used in accordance with the instructions in the table:

Very heavy dirt:	In undiluted form
Heavy dirt	1 part of the preparation: 10 parts of water
Light dirt:	1 part of the preparation: 50 parts of water
Standard washing:	1 part of the preparation: 100 parts of water

If the product is used undiluted or with a high concentration, rinse the surface thoroughly with water after cleaning. In the case of standard cleaning of concrete floors, rinsing is not necessary. To obtain a special gloss effect, you can polish the cleaned floor using a white pad. Before applying the agent, it is recommended to perform a cleaning test. Wash tools with clean water immediately after use.

PHYSICAL AND CHEMICAL DATA.

Chemical composition	An aqueous solution based on surfactants
Color	Brown
pH	approx. 11.5
pH dilution 1:10	approx. 10.5
pH dilution 1:100	approx. 10
Density	approx. 1.0 +/- 0.03 kg/dm ³

PACKAGING.

Plastic bottles and canisters with a content of 1 l, 5 l and 20 l or others after consultation with the customer.

The above information and recommendations are provided by the Manufacturer on the basis of research, tests and experiences. The manufacturer does not guarantee the achievement of an optimal final effect in the event of use inconsistent with the recommendations or storage conditions beyond the manufacturer's control. The information contained in this document is based on currently available data characterizing the product and the knowledge of the Manufacturer. They should only be considered as an aid to the safe use, transport and storage of the product. This does not relieve the user of responsibility for misuse of the above information.

STORAGE AND TRANSPORT.

Transport and store in tightly closed manufacturer's packaging at temperatures from +5 °C to + 35 °C, out of direct sunlight. Do not allow it to freeze. Durability 24 months from the production date.

SECURITY.

ATTENTION: alkaline agent.

Contains: Glucose, decyl octyl ethers, oligomeric (CAS: 68515-73-1, EC: 500-220-1).

Causes serious eye damage.

Keep away from children.

Wear protective gloves/protective clothing/eye protection/face protection.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and can be easily removed. Continue rinsing.

Call a **POISON CENTER** or doctor immediately.

Dispose of contents/container in accordance with local, regional, national and international regulations.

The product contains a mixture of surfactants and excipients: non-ionic surfactants less than 5%.

ATTENTION! The product is intended for professional use. The manufacturer and distributor are not liable for damage caused by improper use.
